

This table represents the abundance of each invasive plant species at each surveyed site:  
 1 = sparse, 2 = moderate, 3= abundant. "Species richness" is the number of species found per site.  
 "Total" is the number of sites where each species was found, "Avg Abundance" represents  
 the average of the abundance measure over all sites.

PlotID	Habitat	Oriental Bittersweet	Japanese Honeysuckle	Bush Honeysuckle	Autumn Olive	Common Buckthorn	Multiflora Rose	Tree-of-Heaven	Empress Tree	Evodia	Norway Maple	Mile-a-Minute	Yellow Bedstraw	Johnson Grass	Thistle	Garlic Mustard	Japanese Stilt Grass	Species Richness
