Registration and prepayment required to hold space; no refunds after June 15.
Partial scholarships available based on financial need; call 540-837-1758 Ext. 287 to inquire.

Forces of Nature
July 8-12, 2013
9 a.m.-Noon
For rising 2nd-4th Graders
The natural world is constantly changing, but what forces cause these changes and how do they work? Camp participants will observe, measure, and manipulate some of Earth’s most powerful forces, including wind, water, gravity, and magnetism. We will even look into the odd electricity of plants!

Seeing Trees
July 15-19, 2013
9 a.m.-Noon
For rising 2nd-4th Graders
Trees are some of our largest living organisms, yet many of us don’t really see trees. Not so for this week’s campers! We will get up close and personal with our towering neighbors. We will identify common species, and learn how trees grow and “work” and how wildlife and people depend on trees. Campers will plant trees at the Arboretum that they can return to visit in years to come.

EcoExplorers
July 22-26, 2013
9 a.m.-Noon
For rising 5th-8th Graders
Blandy’s EcoExplorers ask questions about the natural world, then work with our scientists to answer these questions using observation and experimentation. Participants collect and analyze data and present their results to campers, parents, and staff on Friday morning. Come investigate the plants and animals of Blandy’s meadows, ponds, and woodlands, and prepare for the excitement of discovery!

Family Programs Coming Soon:
Firefly Festival
Making Stone Points
Full Moon Hikes
The Night Sky
Check the Blandy web site or follow us on Facebook.

Summer Nature Camp provides opportunities for students entering grades 2-8 to explore the natural world through experimentation and hands-on activities. Join us as we spend July exploring the beauty of the State Arboretum of Virginia!
