

NAMING OF MR-6

It is proposed that MR-6 - Medical Research Building 6 - be named the Carter-Harrison Research Building.

The proposed name commemorates support for the construction of MR-6 from Rossie Carter Hutchison and the Beirne Carter Foundation, and from the Harrison Family Foundation. Mrs. Hutchison and the Beirne Carter Foundation gave \$5million so that the Beirne Carter Center for Immunology Research can be moved into expanded space which will occupy an entire floor of MR-6. The Harrison Family Foundation, which was set up with funds bequeathed by the late David and Mary Harrison, who during their lifetimes were extremely generous to the University - a tradition the Foundation has continued - has committed \$2.4million toward the construction of MR-6.

WHEREAS, the Beirne Carter Foundation has made generous gifts over the years in support of immunology research at the University of Virginia; and

WHEREAS, Mrs. Rossie Carter Hutchison and the Beirne Carter Foundation together have made a very generous contribution toward the construction of Medical Research Building 6; and

WHEREAS, the Harrison Family Foundation, among its numerous benefactions to the University, has committed significant funds toward the construction of Medical Research Building 6;

RESOLVED, the Board of Visitors names Medical Research Building 6 the Carter-Harrison Research Building, and thanks Mrs. Hutchison, the Beirne Carter Foundation and the Harrison Family Foundation for their generosity and support.
