

## Section 14

---

### Utility Consumers' Taxes, 2001

The *Code of Virginia*, §58.1-3812 and 58.1-3814, authorizes localities to impose a tax on the consumers of public utilities. (This tax should not be confused with the utility license tax, which is a tax levied on utility providers. See Section 12.) Residential customers of telephone, gas, water, and electric services are not to be taxed at a rate higher than 20 percent of the first \$15 of the monthly bill. Any locality that had in effect before July 1, 1972, a tax rate exceeding the current statutory ceiling may continue to tax at the previous level (See *Virginia, Acts of Assembly, 1972, c.459*). The tax on telephone services may apply only to local services. There is no statutory ceiling on the tax on commercial or industrial consumers, and localities generally levy higher rates on these entities.

Counties are restricted in their authority to levy a utility consumers' tax within the limits of an incorporated town if the town itself also levies such a tax provided the town maintains certain services. Counties with a population over 150,000 may not impose a utility consumers' tax if they also impose a tangible personal property tax on household goods.

Section §58.1-3812 authorizes localities to extend the consumer utility tax collection responsibilities to all providers of cellular phone and other mobile telecommunication services. Counties are authorized to impose the telecommunications consumer utility tax on consumers located within a town located within the county, unless the town currently imposes the tax.

If localities wish to change rates for local consumer utility taxes, they must give 120 days notice to providers for such a rate change.

Effective January 1, 2001, the General Assembly repealed the utility license tax on utility providers of gas and electric power and rearranged the rate structure of the utility consumers' tax for electricity and natural gas consumption (see §58.1-3814). The taxes are now based on either kilowatt hours of electricity used by the consumer or hundred cubic feet (CCF) of gas delivered monthly to consumers. The tax schedules and services of the provider are explained in §58.1-2901 for electricity and §58.1-2905 for natural gas. The maximum amount of tax that can be im-

posed on residential consumers as a result of either conversion is limited to three dollars per month, except where a higher limit already existed.

Any excess portions from the local components of the Natural Gas Consumption Tax and the Electric Utility consumption Tax are to be remitted to the State Corporation commission (SCC) to be deposited into the state treasury.

Finally, §58.1-3816.2 was added to give authority to local governing bodies to grant exemptions from any or all the consumer utility taxes (except the E-911 tax) for utilities consumed on property that has been designated as exempt from real property taxes.

In 2001, 38 cities, 82 counties and 94 towns reported imposing at least one type of a utility consumers' tax. **Table 14.1** shows tax rates for residential, commercial, and industrial users of electric, telephone, cell phone, gas, and water services.

In general, tax rates for gas and electricity have been changed. Now, there is often some minimum charge, then a charge for some fraction of a cent per kilowatt hour or CCF used, up to some maximum amount. The intent of the elimination of the utility license tax and imposition of the current price structure is to incorporate the taxes into the pricing structure facing end users.

The tax structure on water and telephone utilities remains the same. Ordinarily there is a percentage charge on the some given amount used for the period. For example, the charge may be 20 percent on the first \$15 or 10 percent on the first \$30. These amounts can vary by locality.

Regarding levies on cell phones, 22 cities, 30 counties, and 16 towns report imposing such a tax. The surcharge amounts to roughly \$3.00 in most localities, based on a rate of 10 percent of the first \$30, but it ranges anywhere from \$1.00 to \$30.00.
