

Section 22

Residential Water and Sewer Connection and Usage Fees, 2004

The *Code of Virginia* § 15.2-2122 authorizes sewer connection fees to finance changes in the sewer system that improve public health. Localities may establish, construct, improve, enlarge, operate, and maintain a sewage disposal system with all that is necessary for the operation of such system. The terms under which the locality can charge a fee are defined in § 15.2-2119.

CONNECTION FEES

Table 22.1 provides the water and sewer connection fees for the 34 cities, 50 counties, and 118 towns that report imposing these fees. Most localities base fees on meter size. In addition to a connection fee, several localities charge other fees. Explanations of fees often vary from place to place, but in general, local facilities charges apply to mains, valves, and hydrants that are installed by the locality. When an owner or developer installs all necessary facilities himself, the charge is generally waived.

Availability fees are charged by some localities in order to prepare for future expansion of the water and sewer capital facilities. Some localities call the fee an “offsite facilities

fee.” Many fee schedules are extremely complex. In such cases, only fees for the standard residential meter size are given in the table.

USAGE FEES

Table 22.2 lists water and sewer usage fees for 25 cities, 26 counties, and 93 towns. The fees are usually multi-tiered with the first several thousand gallons charged at a higher unit rate and the subsequent amount at a lower basis.

Due to the extreme variation among fees in many localities, many local water authorities were contacted directly or information from their websites has been used. For localities that responded with a single fee and not a schedule, it is assumed that the fee listed applies to the standard residential connection, even though no information on meter size was available. If you have questions dealing with responses given in this table, please contact the appropriate water and sewer department or authority in the locality, or see their website if applicable. In Appendix B of our publication, we list the localities’ websites, which will permit the interested reader to link to the appropriate department.

^a The City of Charlottesville has a surcharge of \$200 on water connection that goes to the Rivanna Water & Sewer Authority.

^b The City of Fredericksburg bases its residential rate schedule on number of bedrooms. Figures given are for three bedrooms. The tap fee is waived if the developer has already paid for a subdivision to tap the main.
