

Section 22

Residential Water and Sewer Connection and Usage Fees, 2007

The *Code of Virginia* § 15.2-2122 authorizes sewer connection fees to finance changes in a sewer system that improve public health. Localities may establish, construct, improve, enlarge, operate, and maintain a sewage disposal system with all that is necessary for the operation of such system. The terms under which the locality can charge a fee are defined in § 15.2-2119.

CONNECTION FEES

Table 22.1 provides the water and sewer connection fees for the 36 cities, 57 counties, and 120 towns that report imposing these fees. Most localities base fees on meter size. In addition to a connection fee, several localities charge other fees. Fee schedules used by localities differ, but in general, charges apply to mains, valves, and hydrants that are installed by the locality. When an owner or developer installs all necessary facilities himself, the charge is generally waived. The following table lists the mean, median and first and third quartiles for connection fees for cities and counties:

Water and Sewer Connection Fees, 2007

	Cities		Counties	
	Water	Sewer	Water	Sewer
Mean	\$1,250	\$1,557	\$1,620	\$2,345
Median	800	1,020	1,040	1,900
1st quartile	613	514	750	753
3rd quartile	1,489	1,755	2,400	3,466

Availability fees are charged by some localities in order to prepare for future expansion of the water and sewer capital facilities. Some localities call the fee an “offsite facilities fee.” Many fee schedules are extremely complex. In such cases, only fees for the standard residential meter size are given in the table.

USAGE FEES

Table 22.2 lists water and sewer usage fees for 31 cities, 41 counties, and 106 towns. The fees are often multi-tiered with the first several thousand gallons charged at a higher unit rate and the subsequent amount at a lower basis, but the opposite charging method, a multi-tiered system with the first usage charged at a lower rate than later usage, is sometimes used.

For localities that responded with a single fee and not a schedule, it is assumed that the fee listed applies to the standard residential connection, even though no information on meter size was available. If you have questions concerning responses given in this table, please contact the appropriate water and sewer department or authority in the locality, or see their website if applicable. In Appendix B of this publication, the localities’ websites are listed, which will allow the interested reader to access the appropriate department website.

^aThe City of Charlottesville has a surcharge of \$200 on water connection that goes to the Rivanna Water & Sewer Authority.

^bThe City of Fredericksburg bases its residential rate schedule on number of bedrooms. Figures given are for three bedrooms. The tap fee is waived if the developer has already paid for a subdivision to tap the main.
