Degree Program Approval Process

New degree programs are approved by way of a special appointed group/taskforce. The Task Force recommends a proposal to the School of Nursing Faculty Organization for approval. If the proposal for the new degree program is approved by the School of Nursing Faculty Organization, the School of Nursing then follows the process set forth by the University and SCHEV to request establishment of a new degree program.

Course Approval Process

New degree courses are approved through the appropriate program committee (Baccalaureate Program; Master's/Post-Master's Program Committee; and Doctoral Program Committee). The program committee makes recommendation to the School of Nursing Faculty Organization for approval of a new course.

As of August 2006
