Student System Project (SSP)

The third and final phase of the University's plan to replace all of its administrative information systems is to implement a student information system that will be integrated with the finance and human resources applications. This site will provide ongoing information on the development and implementation of an integrated student information system.

SSP Update/July 2006

SSP Moves from Software to Consulting Vendor Selection

Now that PeopleSoft has been selected as the software vendor for the new student information system, the Student System Project is concentrating on selecting a consulting firm that can provide experience and expertise on PeopleSoft implementations in universities of comparable size and complexity. Take a First Look at PeopleSoft Terminology

A new terminology will emerge from the PeopleSoft student system implementation. Here is a starting primer from the PeopleSoft website for future reference. MORE
