

# RESEARCH BY THE NUMBERS

Today, complex social challenges will be addressed at the interfaces of the disciplines and through collaborative work. Essential to this is the coupling of basic scholarship with experiential learning, applied solution-oriented work, and external partners. Comprehensive research universities are uniquely capable of achieving this coupling, which is essential to high performance in American creativity and innovation. University research has built the intellectual and economic basis for societal well-being in our nation which is today the aspirational ideal of other nations around the world.

# Seed Funding with a Strategy

## The Office of the Vice President for Research

The Office of the Vice President for Research (VPR) is responsible for the integration and enhancement of research activities across UVA's eleven schools and multiple research centers. VPR leads university-wide strategic growth activities, including multidisciplinary groups in environmental sustainability, innovation, energy systems, and biosciences. VPR also coordinates the various University units that comprise the research infrastructure, including the acquisition of research funding, the planning and development of academic research space, research commercialization, the incubation of new companies and recruiting of corporate research partners to local research parks, and public outreach.
