

First Annual UVa Venture Summit

UVa Entrepreneur Interactive Showcase

Featuring:

Biovista
To seek - To know - To act

Biovista systematically repositions existing drugs. It screens over 15,000 marketed drugs (including generics) for possible use matches against over 8,000 diseases and 8,000 adverse events.

**GLOBAL CELL
SOLUTIONS**

Global Cell Solutions, Inc. is a life science focused company that provides novel three-dimensional cell culture products and services.

Husk Power Systems is a provider of electricity to off-grid rural Indian villages. The firm uses agriculture waste (mainly rice husks) to power 40-100kW mini-power plants to villages of 2000-4000 people.

Epicardial Solutions

EpiEP, Inc. is a medical device company that has developed a novel access system for the minimally invasive treatment of certain cardiac conditions, or arrhythmias, in which there is abnormal electrical activity in the heart.

HemoShear, LLC, engages pharmaceutical companies in strategic collaborations to assess efficacy and toxicity of new drug candidates using its proprietary technology that replicates the anatomical structure of the human blood vessel wall and blood flow patterns.

OpenQ is the leading provider of software, expert data and services that enable Life Sciences companies to engage in critical partnerships with the practitioners, policy makers and opinion leaders who drive the development and adoption of a companies' pharmaceutical and medical device offerings.
